

To send the response directly as a PDF file to the user, you can use libraries like `pdfkit` to dynamically ge

### ### Backend Code for Sending PDF Response

```
``javascript  
  
const express = require("express");  
  
const bodyParser = require("body-parser");  
  
const PDFKit = require("pdfkit");  
...
```

You can use this code to generate dynamic PDFs and send them directly to users as responses.
